Little Forest and Other Places continues the focus of my 2021 work. Issues of water in our broader landscape, the nature food production and the rehabilitation of floodplain habitat shape our everyday here. These issues are underlying drivers of my practice. In this body of work I am introducing Little Forest for the first time ... an intimately scaled, Westerly corner of the Koondrook Perricoota Forest icon site. Ecological work has commenced here using the same community driven model as the highly successful Pollack Swamp environmental watering program. I look forward with great anticipation to seeing this habitat evolve over coming years. Please share my ongoing exploration of these special landscapes.
